

As a subscriber I thoroughly enjoy the benefits of XM radio. It's come to my attention that the National Association of Broadcasters (NAB) has presented a petition (04-160) which seeks to limit or deny XM radio's ability to transmit it's local 'Instant Traffic & Weather' channel. Please reject this claim immediately. It isn't worth the taxpayer's money to fund the investigation necessary to reach a decision. XM Instant Traffic & Weather provides a valuable service to subscriber's like myself which find the 'commercial free' medium a superior replacement to broadcast radio!
